## FORMULARY GOLD TONER FOR THE PRINTING-OUT PROCESS (POP)

1-liter kit

These directions assume you are familiar with the POP process or have Formulary's directions for the process. This kit contains the chemicals for an additional liter of the alkaline gold toning bath contained in Formulary Printing-out Process (POP) Kit (Catalog number 07-0110).

### CHEIMCALS CONTAINED IN THIS KIT

Your kit contains the following chemicals:

Chemical	Amount
Borax	8 grams
Gold chloride, 1% solution	16 ml

### CHEMICAL SAFETY

All chemicals are dangerous and must be treated with respect. Please read the chemical warnings on each package. .). **Consult with local sewer and water authorities regarding proper disposal of darkroom chemicals in your area**

One chemical in this kit need special attention: gold chloride.

**Gold chloride** is a caustic and can cause skin burns. In dilute solution, gold chloride will stain the skin purple. The stain is due to gold metal bonded to the protein of the skin and cannot be chemically removed. The only procedure for removing these spats is to let them wear off.

If you are concerned with finger stains, we strongly urge you to use rubber gloves, such as Playtex gloves, when working with solutions of gold chloride.

The user assumes all risks upon accepting these chemicals. **IF FOR ANY REASON YOU DO NOT WISH TO ASSUME ALL RISKS, PLEASE RETURN THE CHEMICALS WITHIN 30 DAYS FOR A FULL REFUND.**

Animal feeding studies in rat, mouse and dog, at high doses, have demonstrated effects on fertility and testes. Studies with the chemically related boric acid in the rat, mouse and rabbit, at high doses, demonstrate developmental effects on the fetus, including fetal weight loss and minor skeletal variations. The doses administered were many times in excess of those to which humans would normally be exposed. Human epidemiological studies show no increase in pulmonary disease in occupational populations with chronic exposures to boric acid dust and sodium borate dust. A recent epidemiological study under the conditions of normal occupational exposure to borate dusts indicated no effect on fertility.
